Objective

To become a part of a cutting-edge web development team, help design and execute new ideas and become a member of a team of people that share a common goal.

Professional Experience

Co-owner / Website Developer, ClickPopMedia

2005-Present

Client Experience:

- **ECS Construction Management:** Complete website and graphic design.
- **Cornerstone Consulting Engineers and Architectural:** Converted website to a modular design to decrease load times and bandwidth usage. Created a mobile and printer-friendly version of the website. Converted numerous documents to smaller, quickly loading, and XHTML pages. General photography and photo editing for clients and services portions of the website.
- **Reply for All:** Co-developer of the entire web portion of Reply for All, an e-mail driven advertising system to help fund various causes. Personally developed the e-mail advertisement hosting script, user-based advertisement [impression] statistics tracking, and user authentication system and user profile pages. Assisted with modifications to a 3rd party advertising engine (OpenX), and with an e-mail account scraping tool for site invitations.
- **From Here to Awesome:** Co-developer of the From Here to Awesome film festival website. Personally developed custom PHP/MySQL data storage and retrieval classes to be implemented into an existing WordPress MU installation, film voting system, and film statistics tracking using the Google Data Visualization API. Assisted in the customization of the WordPress MU theme, and with the development of a custom plugin for WordPress/WordPress MU for importing various user defined feeds in to WordPress.
- **Bobby - The Movie:** Assisted in the development of a 3D virtual walkthrough of the Ambassador Hotel lobby for an interactive website for the major studio film. Personally developed the guest book portion using PHP/MySQL.
- **SchoneMaternity:** Co-developer of a Flash/HTML/AJAX driven e-commerce site for a small independent fashion label. Personally developed the AJAX-based store finder portion as well as customizations in the PHP for the redesign of the e-commerce interface.

Other Work Experience

Lead firedog PC Technician, Circuit City Stores, Inc.

2005-2009

Summary

Managed 3 technicians at a retail based, PC services kiosk. Ensured all technicians followed security and operational procedures and protocols. Diagnosed and repaired PC issues including: Malicious software detection and removal; PC hardware diagnostics, repair and replacement; Software and Operating System issues; and Manufacturer warranty repair service.
